### THE SACRED SALKANTAY TREK AND THE CLASSIC ROYAL INCA TRAIL TO MACHUPICCHU!

### By ITEP "Inka Trail Expeditions Perú...

...The Salkantay trek and the Classic Royal Inka Trail to **Machu Picchu** in Perú is part of an extensive Inka system of trails of more than 23,000 kilometers that integrated the **Tahuantinsuyo Empire "The Inka Country"** (which means four regions) that covered many South American countries such as Colombia, the west of Brazil, Ecuador, **Peru**, Bolivia, to the center of Chile and the north of Argentina. These trails tended to be principally on the coast or in the mountains but in a few cases, they reached the tropical edge of the jungle at the Amazon Jungle.

The Qhapaq Ñan (**Inka Trail** in Quechua "the Inka Language") - refers to the network of trails) were without a doubt is one of the marvels of Tahuantinsuyo, according to the Peruvian historian, José Antonio del Busto, who explains that the Inca "King" Huayna Capac most increased the network of trails in order to quickly mobilize his army.

The trails varied in quality and size, they could be 6 to 8 meters wide on the coast but, in the mountains the paving was only one meter wide but the path was audaciously steep and climbed over the difficult Andean mountains.

The Sun Gate in Machu Picchu or Intipunku is made of steps that makes believe that these were some kind of control gate for the people who enter to Machupicchu Sanctuary.

Is one of the most important archeological constructions that connects the Inka trail with Machu Picchu, is dedicated also to the cult of the INTI, the Sun god, and that's because the Sun on determined times of the years, comes out from this building.

Getting to Inti punku means that we are close to reach the stunning place of Machu Picchu, from that place is all downhill, and from this place you can enjoyed of the amazing view of Machu Picchu Sanctuary, which is breath taking from this point you are able to have a view of the Machu Picchu Mountain, the Vilcabamba or Urubamba River, the Putukusi sacred mountain and Huayna Picchu sacred mountain.

#### ... The Salkantay trek and the Classic Royal Inka Trail to Machu Picchu

**The Salkantay Trek** and the Classic Royal Inka Trail is a great option for reach Machu Picchu through the Sun gate. The trek crosses the Salkantay Pass at 4600m, descends into the cloud forest.

The Royal Inka Trail is considered one of the top 03 best treks in the World and the Salkantay trek (also sometimes called the Salcantay Trek), was named among the 25 best Treks in the World, by National Geographic Adventure Travel Magazine. The part around Mount Salkantay has some outstanding views and the descent later down to 1,000 m above sea level is amazing and not too steep.

#### MACHU PICCHU MOUNTAIN

Machu Picchu Mountain is an unforgettable and lesser-known hike above the Machu Picchu ruins with stunning panoramic view of the valley. Reaching ruins is only one part of the Machu Picchu experience. The other one is climbing the summit of Machu Picchu Mountain at 3,050 meters above sea level for dramatic views of the ruins and lush mountains separated by deep valleys and Urubamba River. As spectacular as seeing Machu Picchu is, the ruins of lost Inca city tell very little if you don't see them in a perspective with the surrounding mountains. It's when you can appreciate the enormous effort of Incas for building a city 2,430 meters above sea level without any use of metal tools or the wheel. Why the city was initially built still remains a mystery.

### **MACHU PICCHU MUSEUM**

The Historic Sanctuary of Machu Picchu achieves the objectives of the preservation and dissemination of cultural and archaeological research. Within a modern and dynamic exhibition, the reopening of Site Museum Manuel **Chavez Ballón** has become the primary means of communication and information for the most important cultural Historical Sanctuary of Peru.

The museum is organized in seven phases; they emphasize the beauty and historical significance of the large collection of artifacts, construction tools (copper and bronze), pins, mirrors, tweezers and needles. Also appearing are the headed ornitomorfa ibis, toucans and oropendolas. The exhibit shows in detail the metallurgical expertise in the Inca city; the spectacular examples of dexterity in stone quarrying, as well as significant objects in various other materials. These displays express to the world, a view of the sustenance of life in Inca Machu Picchu, the strategic administrative center intertwined between the Amazon and the Andes.

Please note: Please confirm if you want to climb one of the Mountains or Visit the Museum as they need to be booked well in advance too, "Ticket are not included and will be charged according Machupicchu Entrance fees rates at the time of booking"; Please note, if you get the permits you will probably have to miss/skip the Machu Picchu guided tour.

# Preparing for the Salkantay and Inka Trail Trek.

We recommend that our guests spend at least 2 nights in Cusco prior to departure. This helps with acclimatization to the altitude and also provides an opportunity to explore the beautiful city of Cusco.

Travelers can feel the effects of higher altitudes as low as 6000 feet (2000 meters) above sea level. They differ in their tolerance for high altitude conditions and how their bodies react to the changes in air pressure and oxygen level. Therefore, we encourage our guests to undergo appropriate preparation by regular cardio-vascular exercise, even if conducted at low elevation, and to adopt a healthy, balanced diet prior to the trip.

Without at least *some* pre-trip training, or a good basic level of fitness, trekking is hard work. Let's be real – it's hard work anyway. The toll for a great trek is paid in sweat. Sore calves and aching quads are badges of honor, with blisters and lost toenails marks of pride.

But in return, you get some of the most untouched, pristine and jaw-dropping scenery on the planet. And you know what? The more you train for your epic hike, the easier it'll be. And you don't have to be an Iron Woman/Man to climb to Andean Mountains or reach the top of Mt Machupicchu. Far from it. Trekking is available to anyone; you just have to be sensible and work a bit for your upcoming trek:

#### 1. Start walking now (it's never too early to start training)

This may seem like the most obvious step to start with (pardon the pun), but you'd be surprised how many people don't do it. The best way to prepare for a really long walk? Do some really long walks. You should start with smallish distances and work up to the length you'll be trekking on your trip. When you start your training, leave a day in between each walk to let your body recover. But as your body gets fitter, try to do back-to-back sessions each day – it'll help build your stamina for the relentless nature of a ten-day trek, where you won't have the luxury of rest days. Ideally, you want to be able to walk 4-6 hours – comfortably – before you leave.

#### 2. Make leg-based cardio part of your routine...

As well as doing long walks, you should also work some leg-based cardio into your daily routine. Cycling is awesome for building up muscle in your legs, but soccer, football, squash and swimming are all great too. If you're more into gym workouts, mix up your spin classes or cycling bursts with squats and lunges (the more weight, the better).

#### 3. Take the stairs every chance you get

Stair climbing is also a good one for building up calves and quads, so take the stairs instead of the lift or escalator when you're at work or the train station.

#### 4. Make sure you're walking properly

You've been doing it since you were around one year old, but it's super important to monitor how you're walking and if you're doing it correctly. Make sure you're hitting the ground with your heel first, then rolling onto your toe, which propels you onto the next step (this will help reduce the risk of shin splints and tendon pulls – ouch). Walk with your head up, eyes forward and shoulders level.

#### 5. Mix up your training terrain...

When you're on your trek, it's unlikely you'll be walking on level footpaths and roads, so avoid training solely on level footpaths and roads. Instead, try to train on surfaces that will be similar to the trails on the trek. If you're heading to Everest or Kili, aim to train on steep, rocky terrain and loose shale; if it's Kokoda, try to find muddy paths. It's really important you prepare your feet, ankles and knees for the stress they'll experience on the trip.

#### 6. Walk in all types of weather

It's also unlikely you'll get ten straight days of perfect weather on your trek, so prepare yourself for all conditions by walking in cold, windy, rainy, warm and humid conditions (where possible, of course!).

#### 7. Try using walking poles

Walking poles will become your two new best friends. They take the pressure off your knees on the downs, and give you extra support on the ups. Incorporate poles into your training sessions so you get used to walking with them.

#### 8. Train with a backpack

On almost all of our trekking trips, you won't be carrying your main pack, but you will need to carry a small daypack, packed with essentials like your camera, snacks, sunscreen and water and wet-weather gear. So, with all your days/weeks/months of training, make sure you're challenging yourself with a weighted bag. If you really want to push it, pack your bag with a few extras, so it's a little heavier than what you're planning to hike with on the trip — it'll make the eventual trek feel like a walk in the park (chortle).

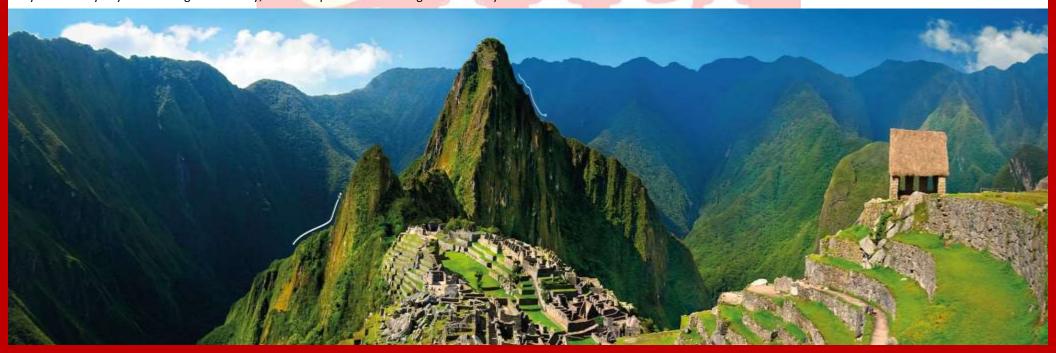

#### 9. Keep the tank fueled

It's SO important you're stocked with enough water and food during a trek (hydration is key!). Nuts, dried fruit, muesli bars and chocolate are all good, quick sources of energy and protein; keep a selection of these healthy snacks in your daypack. Also, bring along a reusable canteen; alpine streams are usually a great source of fresh water, but our guides provide boiled (and cooled) water daily throughout your trek. While you're in training-mode, try to eat and drink 'on the go' as much as you can, so your body can get used to digesting during strenuous exercise.

#### 10. Invest in a good pair of shoes

Your feet are your most crucial body part on a trek, and it doesn't take much to keep them in toe-tappingly tip-top shape. First, invest in a pair of good-quality, water-resistant hiking boots; you want plenty of support and ventilation too. Then, wear them in. How do you do this? Wear 'me everywhere. On your training runs, on walks to the shops, to work, to formal events (well, maybe not). You get the idea though; by wearing them in as much as possible in the weeks and months leading up to the trek, it'll help avoid blisters, bunions and lost toenails. Then, stock up on a few pairs of really good hiking socks (preferably a wool/nylon blend), that will wick moisture and keep your feet dry. If you want to get a bit crazy, wear two pairs while walking to minimize your chance of blisters.

We booked a 5 day salkantay trek. It was an unbelievable time. Our tour guide, Alvina was the best. She was funny and very knowledgeable in Peruvian history.

The meals that were made by our chef, Sebastian were outstanding. We always ate something new and it felt like we were on a food tour instead of actually being in the Andes.

Pick up and drop off were as explained in the meeting before the trip. Anyone who is interested in doing the trek, bring poles! I am fairly young and in good shape and never would have thought my knees would hurt as much as they did.

Overall, an amazing time. I would book again!

●●●● Escribió una opinión el 12 de agosto de 2018 ITEP tour company was amazing to work with! There were 4 people total in our group and we booked Sacred Valley as well as the 2 Day Inka Trall. We felt safe and cared for throughout our entire trip. While the trail was difficult for some of us, our tour guide was with us every step of the way. This company was highly professional and punctual. Communication was great with everyone in this company. Would highly recommend

My girlfriend and I spent two fantastic days visiting Machu Picchu. The first day we survived the Short Inca traill!! Alvina, our guide, with her upbeat attitude kept us always motivated to face the 00000 trek under the pouring rain. Moreover she gave us lots of interesting information about indigenous plants and animals. At the end of first day we finally conquered Machu Picchu. We spent the whole next morning visiting the archeological complex. Alvina explained very well, with words and images, about the buildings and most importantly linea's culture. She also gave us time to take pictures and to explore te site on our own. I thank ITEP TRAVEL and Alvina for the great time we had.

## Excellent hike - Must see!

Great tour, an absolute must for travellers and outdoor nerds. Great tour company and easy to Opinión sobre: Salkantay Trek en 5 días deal with. Reasonable prices, nice variety of tours, friendly staff, great way to meet new friends. Would definitely recommend and use again when I'm back in S.All

We booked the 4d3n trip to Choquequirao at ITEP and we can really recommend it. Great Experience in Choquequirao 00000 The service you get for your money is really really good - we didn't expect such a good service. Our tour guide Santiago and his team was really helpful and careful! We hadn't to care about anything, neither to build up our tent nor if we have enough snacks during hiking... They really took care about every little thing. We also booked a extra horse to carry our things and sleeping bags. The horses seemed to be healthy and the equipment was also good quality.

The meals were absolutely amazing! I have no clue how our chef Nazario could do that but it was always delicious! I am vegetarian and it was no problem.

We would definitely book it again at ITEP!

# Maribel - Machu Picchu Tour Guide

Spent 3 days touring Aguas Callentes and Machu Picchu with Maribel from ITEP tour agency. Her wealth of knowledge of the history, flora and fauna of Peru, her command of English, her patience with questions, and keeping up the morale of the group were very well appreciated.
